Education

Tecnológico superior de Jalisco

Computer Systems Engineering

Arandas, Jalisco

Expected 2025

Relevant Coursework:

- First place in Science Week with the “TouchTrack Software” project: Developed and implemented a fingerprint-based attendance system, used by 600+ students and staff, reducing attendance errors by 80%.
- Third place in Advanced Programming Competition (Java): Solved 8 of 10 complex programming challenges.
- Third place in Science Week with the “AgaMarket Software”: Designed a system to manage agave sales and purchases, improving data accuracy by 50%.

CONALEP Campus Arandas

Technical Professional in Computing

Arandas, Jalisco

2020

Experience

Freelancer

Software Developer

Remote

Jun 2024 – Dec 2024

- Engineered Point of Sale (POS) and inventory systems for retail and auto part businesses, achieving a 30% reduction in transaction time and a 25% decrease in inventory discrepancies.
- Implemented contract generation in PDF format and digital signature functionality, streamlining client contracts and reducing processing time by 40%.
- Created Excel reports, warranty management systems, and warranty contracts, automating 50% of the reporting process and improving accuracy.
- Streamlined digital contract and transaction workflows using PDF signature solutions, reducing manual paperwork by 70% and speeding up client onboarding by 50%.
- Technologies used: Python, Django REST API, React with TypeScript, Tailwind CSS, JWT Authentication, PostgreSQL.

Freelancer

Software Developer

Remote

Jan 2023 – Jan 2024

- Built and deployed a POS system with inventory integration, reducing checkout times by 40% and increasing product tracking accuracy, enhancing sales efficiency.
- Built a small eCommerce platform that enabled online product purchases and user account management, resulting in a 20% increase in online sales within the first 3 months.
- Ensured seamless integration between the POS system and the eCommerce platform, allowing for real-time inventory updates and transaction tracking, improving operational efficiency by 15%.
- Utilized Python, Flask, JavaScript, HTML/CSS, and MySQL to develop user-friendly and efficient solutions, resulting in improved user satisfaction and reduced page load times by 25%.

Leadership & Activities

Tecnológico superior de Jalisco
Project Leader

Arandas, Jalisco
Jul 2022 – Jul 2024

- Directed a team of 5 students to design a competition-winning software, recognized for innovation and functionality.
- Supervised and guided a team of 2 peers to develop academic software solutions.

Skills & Interests

Technical:

- **Programming Languages:** Python, Java, JavaScript, TypeScript, PHP, SQL, HTML/CSS.
- **Frameworks & Libraries:** Django, Flask, React, Tailwind CSS
- **Tools & Technologies:** PostgreSQL, MySQL, MongoDB, Docker, Git, JWT Authentication
- **Other:** Excel, Word, PDF Generation, Digital Signatures

Language:

- **Spanish:** Native
- **English:** Intermediate (Currently improving through courses and self-study)

Interests:

- Committed to mastering emerging technologies and building applications to address real-world challenges, such as improving business processes or automating tasks.
- Enjoy playing football and basketball, which help me stay active and improve teamwork skills.
- Enthusiastic about learning and solving complex problems, constantly seeking opportunities for self-improvement.
- Enjoy being a full-stack developer, working on both front-end and back-end to build complete, functional applications.
